The installation of above files automates Backup Process on clicking Backup Button.

## 2.3 Installation of Database

To install a Database do following: -

(i)

Choose any one of the business process whose Module Character

Accounting Database

**A**

Inventory Database for Manufacturers and Traders

**I**

Human Resource & Payroll Database

**H**

Ball Bearing Traders Database

**B**

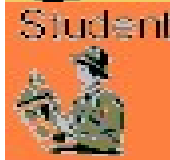

Loan Accounting Database

**L**

Stock Portfolio Trading & Investment Database

**P**

Students Record and Fees Collection Database

**S**

(ii) Create a folder where you want to store data. The name of folder should be kept of 8 characters.

(a) First Three characters indicate Company

(b) Next Four characters indicate Calendar Year

(c) Last character indicate Module Name

*Example:* SDS0506A will indicate Accounting Database of SDS for the year July 2005 up to June 2006.

(iii) In this folder extract all the files from the Accounting Database.Zip file. To install any other database of any other Module, create folder as explained above and extract all the files from its respective Database zipped file from the Installer CD. The Databases zipped file can be downloaded from our website as well
